Portfolio

PROFILE SUMMARY

Full Stack Developer with nearly **3 years of experience** building scalable web applications using React, Next.js, JavaScript, TypeScript, Node.js, Express.js, MongoDB, and PostgreSQL. Core expertise in backend development — REST API design, business logic, database management, and third-party API integration (SAP). Delivered real-time manufacturing management systems and enterprise projects for **Adani Group**. Built a **PMS (Performance Management System)** for managing employee workflows and operations. Passionate about building secure, efficient, and scalable solutions that solve real business problems.

EXPERIENCE

Full Stack Web Developer

Raisematters

June 2024 – Present

- Built and managed backend services for real-time manufacturing and production management applications — handling production orders, machine planning, operator assignments, and workflow execution.
- Developed a complete manufacturing workflow system: raw material management, parts creation, production order allocation, machine scheduling, auto-scheduling, and priority-based urgent rescheduling.
- Integrated SAP APIs to automatically fetch and sync production orders and parts data, significantly reducing manual effort and improving system efficiency.
- Implemented secure OTP-based authentication, user access management, and backend security measures to protect application data and workflows.
- Designed and optimized REST APIs for large-scale production datasets; resolved live production issues to reduce downtime and maintain smooth operations.
- Collaborated closely with frontend teams, backend developers, and business stakeholders to build features and improve code quality through regular reviews.

MERN Stack Developer Intern

MasaiSchool

June 2023 – May 2024

- Developed web applications using React, Redux, Node.js, Express.js, and MongoDB; improved user authentication and purchasing workflows with secure solutions.
- Built and maintained product display and management features; handled bug fixes and continuous feature improvements across the application.
- Conducted technical interviews for Full Stack Developer candidates; reviewed student projects and resolved coding queries across frontend, backend, and databases.

Express.js

MongoDB

Google OAuth

JWT

Redux

REST API

Tailwind CSS

Recharts

- Architected secure user authentication with **Google OAuth 2.0** and email/password sign-up, including OTP-based password reset for seamless account recovery.
- Built isolated user sessions with personalized cart management, order placement, and **real-time order status tracking** tied to individual user accounts.
- Developed advanced product discovery with color-based filters, dynamic price range slider, and multi-criteria sorting — delivering a smooth and intuitive shopping UX.
- Designed a complete cart-to-checkout pipeline with order confirmation and live delivery status updates, giving users full visibility into their purchase lifecycle.
- Built a feature-rich **Admin Dashboard** with real-time charts for sales, product, and user analytics; full CRUD for product management; and centralized order tracking and management across all users.
- Real Time Payment **PhonePay** Integration
